EDUCATION

- **Sardar Vallabhbhai National Institute of Technology** Surat, Gujarat
Bachelor of Technology in Computer Science and Engineering; CGPA: 8.80 *December 2021 – June 2025*
- **Jay International School** Rajkot, Gujarat
Senior Secondary; Percentage: 95.4 *June 2018 – May 2020*

EXPERIENCE

- **Mastercard** Pune, Maharashtra
Software Developer Engineer - I *Jun 2025 – Present*
 - Implementing performance optimizations in the Ledger container to increase settlement file processing capacity from 2M to 60M+ clearing transactions in one cycle.
- **Atlas Consolidated Pvt. Ltd. - [Certificate](#)** Hyderabad, Telangana
Software Developer Engineer Intern *Jan 2025 – May 2025*
 - Implemented unit tests, improving test coverage to 91% class, 94% line, 88% method, and 87% branch coverage.
 - Re-architected a multi-level transaction aggregation workflow by replacing a slow, recursive Kafka-based process with an efficient prefix-based database query system, significantly boosting processing speed and ensuring real-time data consistency.
- **Mastercard - [Certificate](#)** Pune, Maharashtra
Software Developer Engineer Intern *May 2024 – July 2024*
 - Engineered a scheduler tracker service API with Java, Spring Boot, Spring Schedulers, and PostgreSQL to boost productivity and automate tasks.

PROJECTS

- **Chess Bot - (Personal project) - [Github Link](#) - [Project Link](#):**
Technologies: C++, OOP
 - Built a chess bot capable of generating legal and optimal moves at 15 million nodes per second.
 - Reached a search speed of 1 million nodes per second, achieving a performance level equivalent to a 2500 rating.
- **Search Engine (Personal Project) - [Github Link](#) - [Project Link](#):**
Technologies: Typescript
 - Divided the project into 3 stages: web crawler, page rank, TF-IDF scoring, and cosine similarity.
 - Returns search results in less than 1 second after indexing over a million websites.
- **Relaxed Graph Substitutions Using ONNX (Group Project) - [Github Link](#):**
Technologies: Python, ONNX, Tensorflow
 - A prototype implementation of relaxed graph substitution techniques, validating their effectiveness in optimizing computation graphs and improving efficiency.
 - Implemented 3 relaxed substitutions and a cost model incorporating operations and memory constraints.

ACHIEVEMENTS

- **ICPC Amritapuri Regionals 2023: Rank 95** out of 250 teams
- **ICPC Preliminary Round 2023: Rank 301**
- **ACM Inception 7.0: Rank 2** conducted by ACM NIT Surat

SKILLS

- **Languages:** Javascript, C/C++, Java, Typescript, HTML, CSS
- **Database:** MySQL, PostgreSQL, Firebase, MongoDB
- **Framework:** NextJS, ReactJS, NodeJS, Tailwind CSS, Spring Boot
- **Other:** Git/Github, Linux Commands, Communication, Collaboration, Flexibility, Committable, Leadership

CODING PROFILES

- **Codeforces:** 1599 (max rating) (Specialist)
- **Codechef:** 1826 (max rating) (4 star)
